

Overview

ZWQ-INH1 Ammonia Nitrogen Sensor can be used to detect the ammonia nitrogen value of water quality. It can be used in harsh environment and the monitoring data is stable and reliable.

Application

Surface water
Groundwater

Advantage

Corrosion resistant shell, easy to install
Accurate measurement
Built-in PT1000 temperature sensor
RS485 output
Record storage, plug and play
Sensor supports hot swap function

Parameter

Measuring Principle	Ion Electrode
Measure Range	0-1000 mg/L
Measure Resolution	0.01 mg/L
Measure Accuracy	10% or 0.1mg/L
Material	POM
Interface	RS485 (Modbus RTU)
