

## Overview

ZWQ-ICL Chloride Sensor can be used to detect the Chloride value of water quality. It can be used in harsh environment and the monitoring data is stable and reliable.

## Application

Surface water  
Groundwater

## Advantage

Self-cleaning function  
Samples need not be treated and extracted  
Accurate measurement  
Record storage, plug and play  
Sensor supports hot swap function

## Parameter

Measuring Principle	Ion Electrode
Measure Range	0-10000 mg/L
Measure Resolution	0.01 mg/L
Measure Accuracy	±10%
Material	POM
Interface	RS485 (Modbus RTU)
