

## Overview

ZWQ-IF1 Fluoride Sensor can be used to detect the Fluoride value of water quality. It can be used in harsh environment and the monitoring data is stable and reliable.

## Application

Surface water  
Groundwater

## Advantage

Corrosion resistant shell, easy to install  
Accurate measurement  
Built-in PT1000 temperature sensor  
RS485 output  
Record storage, plug and play  
Sensor supports hot swap function

## Parameter

Measuring Principle	Ion Electrode
Measure Range	0-1000 mg/L
Measure Resolution	0.01 mg/L
Measure Accuracy	±5%
Material	POM
Interface	RS485 (Modbus RTU)
