

ZWQ-PH1 PH ELECTRODE SENSOR

Overview

ZWQ-PH1 pH Electrode Sensor that can be used to detect the pH value of water quality. It can be used in harsh environment and the monitoring data is stable and reliable.

Application

Surface water
Groundwater

Advantage

Corrosion resistant shell, easy to install
Double salt bridge design, longer sensor life
The annular exudation interface design
Blue glass bulb design, no drift, higher accuracy
Record storage, plug and play
Sensor supports hot swap function

Parameter

Measuring Principle	Glass Electrode
Measure Range	0-14 pH
Measure Resolution	0.01pH
Measure Accuracy	±0.1pH
Response Time	< 15s
Interface	RS485 (Modbus RTU)
